

Fast-Traveling Rib

This picture of Fast-Traveling Rib provided by Elaine Joann Lyons

Multiple of 12 stitches

This pattern is called "fast" because, unlike most cable patterns that work the cable stitches on only the right side (public) rows, this pattern works the cable stitches from both sides of the fabric. The result is a steeper slope to the rib -- it "moves" across the fabric faster. The trick is to get used to working the cable stitches on the wrong (private) side of the fabric.
